What is Popmoney?

Popmoney is a person-to-person payment system where you can send money to and receive money from anyone you know, regardless of where they bank. It's safe and secure, and all you need is an email address or mobile phone number.

Popmoney's network includes 1400 US financial institutions and over 35 million customers.

How do I access Popmoney?

Log onto your Boulevard Bank Online Banking account and click on the "Pay Bills" tab within your checking account. Within this tab, you can begin the process by clicking on the "Popmoney" tab. Input your contact's information, as requested, then let them know that your payment is on its way. The first time you send payment, the recipient will receive an email or text message with the information on how to retrieve it.

What can I do with Popmoney?

- Send money to or receive money from your family or friends...all electronically!
- Personalize your gift payments with an e-greeting template
- Set up future-dated payments and recurring payments
- Send money using either an account number, email address, or mobile number
- Receive money by clicking on the "Get Money" tab

How secure is Popmoney?

Very! From the moment information is sent to Popmoney to the time it is stored and accessed again, it is encrypted using industry leading software, hardware and algorithms. Security is also utilized at specific points and actions in the product. For example, to help prevent an unauthorized person from fraudulently depositing someone else's payment, one-time passcodes are used. For every initial payment to a new email address or mobile phone number, a one-time passcode is sent to the user. The user must provide that passcode back to Popmoney to verify his "ownership" of that mobile number or email address before he can deposit the payment.

How much does it cost?

It only costs 50¢ to send a payment of any size. It does not cost the recipient anything.
